

REALTIME DEFORESTATION

Monitoring System

Soy and cattle supply chains
Amazon & Cerrado biomes – Brazil

February 2022

aidenvironment

Aidenvironment develops **Realtime Deforestation Monitoring (RDM)** reports to engage companies and urge action towards real-time deforestation events, as well as to support financial sector and civil society stakeholders in their efforts to halt deforestation linked to commodity production and trade. In Brazil, recent increase of deforestation rates is mostly linked to the expansion of Soy and Cattle production within Amazon and Cerrado biomes. The RDM report of February 2022 presents **six cases** linking recent deforestation to soy traders' and beef processors' supply chains. The six cases are all in the **Cerrado biome** in the state of Bahia and Piauí. The total deforestation reported by the six cases is **21,265 hectares**, which are linked to **519 fire alerts**.

Confirmed supply chain link, level of certainty, and soy trader/ beef processor		Yes	Medium	Cargill, ALZ Grãos
Soy	Main exporters (municipality)	Cargill (100%)		
	Warehouses (50 km radius)	18 warehouses, e.g.: 2 owned by Multigrain (22,000 MT)		
	Supply chain links & details:	ALZ Grãos had contracts with another property under the same ownership		
Beef	Main exporters (municipality)	JBS (80%), Frigosol (20%)		
	Slaughterhouses (sourcing from the municipality)	29 different beef processors sourced cattle from Jaborandi in 2017, e.g.: 1 owned by JBS (Itapetinga - BA)		
	Supply chain links & details:	-		
Other supply chain links and details:		Fazenda Correntina, in Jaborandi (BA), supplied cotton to CDI do Brasil Comércio e Exportação de Commodities Ltda in 2014. In 2017, Estreito Agropecuária supplied suggar cane to Usina Estiva in Baía Formosa (RN), owned by Pipa Agroindustrial.		
General comments				
<p>Registered in Recife (PE) , Rio Pratudão Agropecuária is controlled by José Ranulfo da Costa Queiroz Neto and his brothers-in law Frederico Meira de Vasconcelos and José Vicente Meira de Vasconcelos Neto. The three businessmen own sugarcane and coconut plantations in the states of Pernambuco, Paraíba and Rio Grande do Norte, and soy and cotton farms in Bahia. In 1997, José Ranulfo was elected president of Sindaçucar in Pernambuco, one of the main employers' union in the sugarcane sector of which he is currently a board member (1). In 2006, 111 workers were rescued from slavery labor conditions in Fazenda Correntina, owned by Rio Pratudão Agropecuária (2). In 2007, 2,000 workers occupied one of his distilleries Usina Salgado, in Ipojuca (PE), protesting for labor debts held by the company surpassing BRL 200 million (3).</p> <p>In the harvesting season between 2013 and 2014, Rio Pratudão Agropecuária estimated revenue from soy and corn plantations in Western Bahia was BRL 23 million (7). In 2016, José Vicente Meira de Vasconcelos Neto was prosecuted by illegal deforestation of an Atlantic Rainforest area in Mamanguape (PB) linked to coconut plantations (8). In 2011, Estreito Agropecuária was fined by Ibama for disrupting the regeneration of 36.8 hectares of native vegetation on a property in Baía Formosa (RN) (9). In 2017, Estreito Agropecuária produced 196,000 tons of sugarcane at Baía Formosa (RN), supplied to Usina Estiva, sugarcane mill from Pipa Agroindustrial, involved in land conflicts against indigenous communities (10).</p>

Beef	Main exporters (municipality)	JBS (100%)		
	Slaughterhouses (sourcing from the municipality)	17 different regional beef processors sourced cattle from São Desidério in 2017. No info about JBS.		
	Supply chain links & details:	-		
Other supply chain links and details:		Between 2014 and 2018, Paulo Mizote supplied cotton to numerous clients, including Bunge, LD commodities, Cofco, Toyoshima USA Inc, Plexus Cotton Limited, ICT Trading SA, and Paul Reinhart (based on export data)		
General comments				
<p>Grupo Mizote is involved in the production, trading and export of soy, corn, and cotton. It is one of the main cotton producers in West of Bahia state (1). Paulo Massayoshi Mizote is (co-owner) of at least seven companies in Bahia. In 2012, Mizote family was fined BRL 5.4 million for environmental infractions in Fazenda Sassapão, in Formosa do Rio Preto, having 2,262 ha embargoed by Ibama (2). Grupo Mizote is listed in the Comissão Pastoral da Terra (CPT) report as linked to an agrarian conflict involving 240 families in 2016 and 2017 (3). In 2013, Correntina's citizens started a movement called “Fora Mizote” to halt a concession to deforest 24,599 hectares of native Cerrado by Grupo Mizote in the Fazenda Barra Velha (5). Grupo Mizote collects the 11th largest volume of water in Cerrado biome in Bahia among the companies linked to the Bahia Association of Farmers and Irrigators (Aiba) and Abapa. The companies have an authorization to capture 76.3 million litres per day from the Rio Grande Basin, one of the main tributaries of the São Francisco River (6).</p> <p>Mizote family is also involved in a land dispute in Formosa do Rio Preto (BA) with alleged land grabber José Valter Dias, accused of forging documents and bribing local judges to confiscate an area of 300,000 ha (7). In 2014, MetLife Inc., one of the largest global providers of insurance, annuities, and employee benefit programs, with 90 million customers in over 60 countries, provided a loan of USD 30 million to Paulo Massayoshi Mizote (8).</p>

General comments				
<p>Cooproeste, owned by Ricardo Hidecazu Uemura, Jorge Tadashi Koyama, Helio Kiyoshi Kobayashi, is a large storage company playing an intermediate role between producers and traders in West Bahia. Their assets include 14 silos (1). The three owners of Cooproeste have, together, 6 environmental fines: 3 fines for clearing 163 ha and 120 ha of native vegetation in Fazenda Mauá III and 226 ha in Fazenda Tupi, both in São Desidério (BA), in 2016; 1 fine for failing to comply with an embargo for celaring of 800 ha of native vegetation in Formosa do Rio Preto (BA) in 2008; 1 fine for clearing native vegetation without authorization in Fazenda Umuarama, in Formosa do Rio Preto (BA), in 2014; and 1 fine unauthorised deforestation of an unknown area in São Desidério (BA) in 2019 (2). Cooproeste is certified under UTZ scheme in the coffee supply chain (3). The company is also pointed as an exporter of cotton, soy and coffee (4).</p>

	Supply chain links & details:	Direct supplied cattle to 5 regional slaughterhouses: Frigorífico Vale do Sol (Jequié-BA), Frigorífico Regional de Barreiras (Barreiras-BA), JF Agropecuária (Simões Filho-BA), Frigorífico Campo do Gado (Formosa do Rio Preto-BA) and Fazenda Baixão (Santa Rita de Cássia-BA) in 2018. A linked farm, Fazenda Triunfo, in Formosa do Rio Preto (BA) indirectly supplied a slaughterhouse owned by JBS in Itapetininga (BA) through other 4 farms between 2018 and 2019		
Other supply chain links and details:		Fazenda Triunfo, a linked property, supplied corn to Asa indústria e Comércio (PE) in 2014		
General comments				
<p>Fazenda Novale (Santa Rita de Cássia, Bahia) and Fazenda Triunfo (Formosa do Rio Preto, Bahia) are part of the owner's family business integrating cattle and soy production (1,2) in Western Bahia. In 2021, the family's cattle business included 5,000 (3). A family member is partner of the Cooperativa dos Produtores Rurais da Bahia (Cooperfarms), present also in Goiás and Tocantins states (4). The family owns also a company that officially represents the John Deere brand in Rio Grande do Sul (5). In November 2019, Agropecuária A. Manjabosco and Agropecuária Mariana Manjabosco were part of a Federal Police's operation, Avati, which resulted in a prosecution for tax frauds (totaling BRL 6,5 million), money laundering and criminal association together with other groups and landowners (6).</p>

General comments				
<p>Delfin Rio S/A is owned by Levinsohn family. The family operates the Condomínio Agrícola Estrondo, a land-grabbing case linked to human rights crimes and environmental impacts direct affecting the livelihood of local communities (1). The case of Condomínio Estrondo is well reported by Mongabay (2, 3), De Olho nos Ruralistas (4), Repórter Brasil (1), Greenpeace (5, 6) and the local NGO 10envolvimento (7).</p> <p>In June 2020, the Bahia Court of Justice (TJ-BA) denied an appeal request made by Condomínio Agrícola Estrondo against the court decision that guarantees possession of 43,000 hectares of the area to a local community of “Geraizeiros” in Formosa do Rio Preto, Bahia (8). According to local sources, violence against the communities has increased after the judicial defeat of Condomínio Agrícola Estrondo (9).</p> <p>Bunge and Cargill indirectly source soy from Fazenda Condomínio Estrondo (10).</p>

General comments				
<p>De Carli is a conceived land grabber (1) who died in June 2019 (2). In May 2015, an investigation of the Federal Public Ministry and the Federal Police of Piauí unveiled a land grabbing network connected to Euclides de Carli, pointed as the main land grabber in Matopiba region, controlling over 1 million hectares (3, 4, 5). In 2016, a justice court in Piauí blocked the titles of 124,000 hectares in possession of De Carli (6). De Carli's company, CODECA, also connects to TIAA-CREF investments in Brazil, operated by Radar S/A, a joint venture with Cosan (7, 8). The local Agrarian Court estimates that 300,000 ha of land in Maranhão and Piauí states are linked to De Carli's land grabbing crimes (9). De Carli is also accused of violence and threats connected to invasions of lands occupied by local communities (1, 8). He is still registered as the owner of 16 different companies in Maranhão (10).</p> <p>Deforestation also falls in a bordering property, Fazenda Rocha, registered in the name of Antônio Rocha Neto. There is a process requesting the recognition of the land ownership of an area of 15,400 hectares in Santa Filomena (including Fazenda Rocha), issued by Antônio Rocha Neto and denied by the Land Institute of Piauí, attesting that the applicant is "irregularly occupying a public land" (11).</p>

Deforestation and fire alerts data are the starting point of the analysis for each of the case studies. After confirming the clearance of native vegetation through satellite imagery, each of the case is then analysed through the Aidenvironment database crossing data from different sources and datasets as described below. Finally, the data is validated by a local partner and a qualitative analysis of each case is developed making use of publicly available data.

Deforestation & Fire

We processed deforestation alert data from the INPE/Deter program for both biomes, Amazon and Cerrado. An alternative source is the Global Forest Watch (GLAD alerts) and the Mapbiomas Alertas platforms. The fire alerts are checked in the NASA/Firms platform and processed using EO Browser Copernicus Sentinel platform. For each selected case, the deforestation is confirmed through satellite images.

Landownership (SIGEF/SNCI/SNCR) and the Environmental Cadastre self-declaration (CAR)

The landownership data is from the Federal Tenure Land systems SIGEF and SNCI, crossing it with SNCR to identify the ownership. The landownership registration on local notary offices is not checked and might be different than the federal systems. The self-declaration for the Environmental Cadastre (CAR) is checked in the Federal System SICAR, including the Legal Reserves and Permanent Preservation Areas (APP) according to the Brazilian Forest Code. For some states, such as Mato Grosso and Pará, it is possible to check the CAR declarant name through the Environmental State Agencies' CAR platforms. It is important to highlight that CAR is not recognized as official ownership data.

Brazilian Forest Code protected areas

Legal Reserves and *Permanent Preservation Areas (APP)* are defined by the Brazilian Forest Code as having mandatory conservation status on private properties. The size of *Legal Reserves* in private properties varies according to the biome [80% Amazonia biome, 35% Cerrado biome inside Legal Amazon, 20% other areas], and *Permanent Preservation Areas (APP)* are those linked to water and soil conservation areas (close to river bases, wetlands, slopes, and high hills.) The Legal Reserve and APP areas considered in this report are those self-declared within the Cadastro Ambiental Rural (CAR) system – Brazil's environmental registration system. In some cases, the CAR was also used to find information on ownership because even if it is a self-declared document, in some cases it still provides the most recent information on who is operating in a property.

Conservation areas and Indigenous Territories

Conservation Areas data is from the ICMBio, responsible for monitoring and management the Officially recognized Natural Reserves according to the National System of Natural Reserves (SNUC – Sistema Nacional de Unidades de Conservação). The SNUC determines jurisdiction of the area - federal, state or local government, or private owner - and how the natural resources may be used by whom in each of the natural reserves' categories. Indigenous Territories data is from FUNAI, the National Foundation for Indigenous Populations. Indigenous Territories are officially recognized and determine areas where local Indigenous populations have customary rights to access and use the land.

Type of Vegetation and Priority for Biodiversity Conservation

The type of vegetation data is from the IBGE (Brazilian Institute of Geography and Statistics) and Embrapa, consulted through the INPE website. The classification according the Priority for Biodiversity Conservation is from a study elaborated by the Brazilian Ministry of the Environment updated in 2018.

Environmental Embargoes and Fines

Embargoed areas and Environmental fines are checked in the database form IBAMA, the Federal Environment Agency. Embargoes are areas where any kind of activity is suspended or unauthorized by IBAMA oftentimes due to environmental degradation or other crimes such as slavery labor. Properties can be removed from the list of embargoed areas after having addressed the problem. Environmental fines are usually linked to regulation infractions and are addressed to the owner of the property.

Company Group and linked properties

Once the ownership of the property is clearly linked to an individual, we use the SINTEGRA database to check all the registered companies under this individual or group of individuals names. If the ownership is already registered by a company, we also check the corporate structure of the company through open sources websites. Once the ownership, linked companies and corporate structure are defined, we search for other properties registered under the same or similar ownership in the Federal Tenure Land systems SIGEF and SNCL.

Level of certainty of links to soy traders and beef processors

Soy – High: trading relationship between the owner of the property and the trader is confirmed by traders or by the National Supply Company (Conab) trading subsidy programs, or traders have assets (warehouses) within the boundaries of the property; Medium: trading relationship with the corporate group, not necessary with the specified property is confirmed by traders or by Conab's subsidy programs; Low: trader is the main soy exporter in the municipality (Trase platform), or traders have assets (warehouses) within a radius of 50 km from the property.

Cattle - High: animal transportation data (GTA) confirm direct trading relationship between the property and beef processors; Medium: animal transportation data (GTA) confirm indirect trading relationship between the property and beef processors; Low: beef processor is the main meat exporter in the municipality (Trase platform), or beef processors have assets (slaughterhouse) within a radius of 50 km from the property.

Main exporters (municipality), warehouses and slaughterhouses

The data on main soy and beef exporters per municipality is from Trase platform. Warehouses' location is from the SICARM and slaughterhouses' location from the Ministry of Agriculture.
